- ▶ Complete Workflow Within One Interface
- ▶ All Functions Are Easily Operated by the Mouse
- ▶ Specific Milling Strategies for Different Materials to Extend Tool Life
- ▶ Capable of Milling Models
- ▶ 3 Years of Free Software Updates & Maintenance

Authorized Premier Distributor
ETI DIGITAL TECHNOLOGY
Complete Source for the Future

**Simplified Manufacturing
Adaptive & Reliable Technology**

“ Since the addition of the Roland DWX-4 with Unique CAM software to our dental laboratory, we have increased our lab’s output without adding more employees and offer more and better prostheses. It has allowed us to compete with the big labs but still be able to maintain customer attention. With the DWX-4 mill and Unique CAM software, we are capable of providing a variety of restorations for our clients in a fraction of the time it would have taken by conventional methods. The new digital workflow has opened many doors and opportunities that we could only dream about just a couple of years ago.”

— Mr. Vache Hacopian, Lab Owner at Remedy Dental Studio Inc. (Los Angeles, California, USA)
